CASE STUDY

PANEL+® STONE

Vasa Gym, Herriman, UT

60,000 sq ft

OBJECTIVES

Enhance the energy efficiency, durability, and aesthetic appeal of Vasa Gym's exterior in Herriman, Utah, using an innovative and cost-effective solution.

SOLUTION

Implement the Panel+ Stone Exterior Insulation and Finish System (EIFS) by Old Mill Building Products. This system integrates continuous insulation, an air and water barrier, and a high-quality stone veneer, ensuring a comprehensive and efficient exterior solution.

AT A GLANCE

Products Used

- Old Mill Weather Barrier
- Old Mill Adhesive Mix
- 1" EPS Foam Insulation
- Thin Stone Ledger

Benefits

- Sound Dampening
- Moisture Management
- Continuous Insulation
- Saved on Labor & Time

FEATURES & BENEFITS

Energy Efficiency

- Continuous Insulation: Achieved a thermal R-value of 4.2 per inch, reducing energy costs.
- Air and Water Barrier: Prevents air leakage and moisture infiltration, enhancing overall energy efficiency.

Ease of Installation

- No Mason Required: Reduces labor costs by up to 60% with built-in alignment features for perfect spacing.
- Versatile Application: Suitable for various substrates and can be used on floors, walls, and ceilings.

Durability & Safety

- NFPA 285 Compliant: Meets fire safety standards, ensuring top performance and safety.
- 15-Year Warranty: Guarantees long-term reliability and peace of mind.

Aesthetic Appeal

- Authentic Stone Look: High-quality stone veneers provided a timeless and elegant appearance.
